How to motivate your children to like Chinese Language in a non-threatening environment? Our **FUN and COMPREHENSIVE art program** is your answer. Our program encourages individual competence and achievement in learning to say and express thoughts, feelings and values in visual forms. It is not mere manipulation of art materials, but on skills of mind, heart and hand.

Studies have also shown that art education programs have demonstrated increased student performance in other academic areas, due to art activities' exercising their brains' right hemispheres and delateralising their thinking.
